Submission Entry Form

About the Crowdsourcing Contest

Thank you for your interest in participating in this crowdsourcing call! We are looking for innovative solutions that can increase the use of pre-exposure prophylaxis or commonly known as the PrEP. PrEP is a proven and effective means of preventing HIV infection through or on-demand use of this oral antiretroviral medication.

We are open to receiving fresh ideas or existing projects/interventions/solutions with initial prototypes or has been pilot tested as long as it focuses on facilitating the awareness and increase use of PrEP among key populations (e.g., men having sex with men and transgender persons).

Section 1. About the Innovator

Important Note: If your entry is chosen as one of the top 10 submissions, how would you prefer to be acknowledged? Please tick one of the boxes below:
- *Please include both the project title as well as my name*
- *Include only the project title. Please do not include my name in the announcement.*

1. Full name (or pseudonym/alias):
2. Nationality:
3. Organizational affiliation (NA if not associated with any organization)
4. Year innovation started (if applicable)
5. Sites of operation (if applicable)
6. Website/social media account of the innovation (if any)
7. Links to external content such as website links, pictures of the organization and/or innovation (if applicable)
8. Contact information (email and/or mobile number)
9. Organizational structure/sector (government agency, hospital, academe, NGO, etc.)
10. How did you hear about this crowdsourcing call? (e.g., email received, website, newsletter, poster, others)

Section 2. About the Innovation

1. Name of the (proposed or existing) innovation/solution:
2. What barrier or challenge does your proposed solution seek to address?
3. Describe your innovation. *Please describe the innovation in detail including the different actors involved, processes, and products associated with it:*
    0. General description of the innovation
    1. How can the innovation increase the awareness of and use of PrEP?
    2. Who should be involved in the planning and implementation?
    3. What is the current status of your innovation? (idea, with prototype, with small scale pilot)
    4. How is your solution different and unique in our context?
4. Describe the affordability of your solution.
    0. How does the cost of your solution compare with existing alternatives?
    1. How much is the start-up and annual cost to implement your solution?
    2. If there isn't any existing solution, how affordable is your solution compared to the minimum daily wage of the key populations?

5. Describe the sustainability of your solution.
    0. Is your solution dependent on grants, donations or do you have a revenue stream? Please describe your revenue model/stream.
    1. How can your solution be integrated into the community or adopted in various different health system levels and settings?
6. Describe the potential positive impact of your solution.
    0. What metrics/parameters do you intend to measure to check if your solution addresses the barriers/problems it intends to address?
    1. How do you ensure access and equity? In what ways can you consider the needs of excluded or marginalized members of the society?
7. Future Plans
    0. What are your future plans for your innovation? Describe your roadmap, if any.
    1. What kinds of support do you need to further your innovation?

Section 3. Supporting Documents. Please provide documentary proof of your innovation or other relevant documentation. These may include technical reports, publications, certifications, or photographs among others.
